Earnings Release

Results for the Quarter Ended June 30, 2018

**Poised to be the largest 3PL service provider in India in the consumption space;
Aggressive infrastructure expansion plan supported by strong revenue visibility**

August 7, 2018, Mumbai: Future Supply Chain Solutions Limited (FSC or the Company), a leading third-party supply chain solutions specialist and logistics service provider, today announced its results for the quarter ended June 30, 2018.

Key Standalone Financials:

- Revenue from operations grew 50.0% year on year to ₹ 2,279 million;
- EBITDA grew 33.5% year on year to ₹ 323 million;
- PAT grew 37.7% year on year to ₹ 179 million;
- Trade receivables days declined from 108 days in FY18 to 94 days in Q1 FY19;
- ROCE (adjusted)ⁱ remained strong at 27.7% in Q1 FY19.

Key Operating Highlights:

- Warehouse space increased by 1.03 million sq. ft. to 5.61 million sq. ft. during the quarter;
- Revenue per square feet increased by ~20% year on year to INR 110 per month;
- Contribution from non-anchor customers increased from 33% in FY18 to 41% in Q1 FY19ⁱⁱ.

Commenting on the results and the business outlook, Mayur Toshniwal, Managing Director of FSC said “I am pleased to report a strong start to FY19 with Q1 revenue from operations growing significantly at around 50% year on year. This is a culmination of strong growth from the anchor customer and increased traction from non-anchor customers.

During the quarter, we acquired several reputed clients in the consumption-driven sectors. I am thankful to them for their faith in FSC for managing such a crucial function for them.

Further, we have strong demand visibility for the medium to long term and as a result, the Company has now stepped up its warehousing expansion plan for the current year. I am happy to share that we have added close to 1 mn sq. ft. area in the first quarter and are looking to add around 2 million sq. ft. in the coming nine months. This expansion will largely be supported by our internal accruals and a strong balance sheet.”

Increasing traction from new and prospective clients to provide revenue visibility

The business outlook for third party logistics sectors continues to be strong driven by product companies' increased focus on their core competencies and outsourcing of the non-core activities including supply chain management. With GST now becoming a well-entrenched reality, product companies are re-thinking about their supply chain strategy and are likely to consolidate their warehousing operations. This will create a need for managing large scale warehouses, which requires specific domain expertise. Hence the role of 3PL service providers, such as FSC, is likely to increase in future.

In the recent past, the Company has added several reputed names to its customer portfolio. This includes Haldirams (a reputed Indian snacks brand), Crompton Greaves Consumer Electricals Limited (an established appliances brand), Myntra (a well-known e-commerce platform) and many more.

The Company continues to focus on acquiring many more new clients in the consumption driven sectors. The Company has a healthy 12-month sales funnel of INR 4,000-5,000 million, where it is at various stages of discussion with the prospective clients. It expects healthy conversion from this funnel to drive strong growth in its revenue in the current and next fiscal year.

Aggressive warehouse expansion plan for FY19

The Company has announced that it aims to add 3 million sq. ft. of warehousing space in FY19. This is supported by internal accruals and a strong balance sheet. The Company has clear revenue visibility for this additional space and hopes to scale up operations in these distribution centres in the next 6-12 months. It added 1.03 million sq. ft. of area during the quarter ending June 30, 2018, which is a stellar achievement as per the Company management.

Received two-notch rating upgrade for its credit facilities

Recently, CARE Ratings Limited upgraded the credit rating of the Company by two notches, for the bank facilities availed by the Company. This is likely to help the Company bring down its cost of debt. The details of the changes in the credit rating are highlighted in the table below:
